MAIN REQUIREMENTS

A fully responsive one page website as a start with interactive elements throughout. In the future, implemented into Typo3 with more pages.

Like animation on http://demo.visionswebsites.com/visionssinglepage/

LATEST DESIGN LINKS

http://www.besimplebeclever.com/say/sayhome_2a.html

- with the logo in the middle
- and no interactive elements showing

http://www.besimplebeclever.com/say/sayhome_2b.html

- with the logo on the left and contact details on the right now,
- DEVELOP card showing on click,
- WHO WE ARE showing more content,
- and the footer showing a contact form instead of contact details

---

COMMENTS

VERY TOP LINE

The logo I want bigger when you first come to the site and its centred like on spook studio. When people scroll down the logo reduces in size similar to http://www.spookstudio.com/

'Get in touch' will take you to the footer and open the contact form.

HEADER IMAGE

Only the text is going to rotate.
Not sure about the image under what we promise but only because of the wording you can't read under it. We can leave this for the moment though. We might just move the image up or down a bit.

HOW WE WORK

The icons will rotate once the cursor is hovered over them like this site: http://www.jbidigital.co.uk/. So the icon will show and when its hovered over the writing appears.

WHAT WE PROMISE
Find a nice way to make it responsive.

WHAT WE OFFER
Find a nice way to animate it on load.

WHO WE ARE
Click on 'Read More' to show more text.

FOOTER
Click on 'Talk to Us' to open a small form similar to http://www.spookstudio.com/
